Shiatsu and Swedish Massage

Swedish massage technique facilitates smooth, gliding strokes over the entire body. Our specialists will also use classic techniques which includes kneading, friction, stretching and (sometimes) tapping to promote relaxation, ease muscle tension and create other health benefits.

While, Shiatsu massage technique is an old, traditional, Japanese healing method. Shiatsu means "finger pressure." But unlike the massages of the West, where kneading and friction is used, in shiatsu pressure and stretching is the key. Our specialist will use palms, fingers, thumbs, knuckles, to work on the body's acupuncture points, along what they consider the body's meridians or energy channels. It's a form of "touch communication," and is a safe and effective preventive medicine. It helps to balance a person's energy flow, and strengthen the vital organs.

So, what are you waiting for?

ECO FRIENDLY Announcement

In our mission to be eco-friendly, we have replaced our white styro-like disposable slippers with lilac rubber slippers that can be re-used.

However, if you mind a "re-usable" slipper, for AED 6, we will keep the pair under your name and will be kept wrapped for your next visit.

We have also started an eco-friendly retail package of hair care, one bottle of shampoo, one bottle of conditioner and one hair serum for AED 80. If you bring the shampoo and conditioner bottles back for refill, you only have to pay AED 15 for both.

Watch this space; we have other eco-friendly initiatives which you can be proactively part of ☺
